

SPECIFICATION

As requested by the Examiner, a new Abstract is submitted herewith as a separate sheet of paper. Entry is respectfully requested.

A marked up copy of the abstract is as follows:

A method of making a cosmetic cover comprising includes coating the interior of a mold with successive layers of one or more curable materials. An outer such layer is provided with means to create a non-homogenous colour effect in that layer, and at least an inner such layer is provided with means to create a background colour, for the said outer layer, in the said inner layer.
